

Upcoming Course: Systematic Molding

Gain the Knowledge to Improve Your Process

Are you sick of shipping defective parts? How about hand-sorting parts for quality or chasing down processing issues? We understand. That's why we built this three-day Systematic Molding course around people across the globe just like you.

What is Systematic Molding?

Systematic Molding is the foundation for all RJG training sessions. Through a combination of classroom instruction and activity-driven learning, students leave with a better understanding of how to develop a machine-independent process, how to make data-driven improvements to existing processes, and how to effectively troubleshoot using scientific and systematic approaches.

Is Systematic Molding for Me?

Systematic Molding is right for anyone who is involved in the injection molding process. By training engineers, management, and support alike, the entire plant is able to speak the same language and run more smoothly than ever.

This Course is Ideal for:

- Process and design engineers
- Project managers
- Management
- Support (tooling, quality, planners, etc.)

What We Will Cover:

- Mold and part design considerations
- The four plastic variables
- The molding system
- The molding problem, simply stated
- Processing from plastic's point of view
- Introduction to instrumentation strategies

Note: On-machine practice is not guaranteed.

Upcoming Course Details:

Date: March 5-7, 2019

Time: 9am - 5pm EST (Day 1)
8am - 5pm EST

Location: Hampton Inn Indianapolis/Carmel
12197 N. Meridian Street
Carmel, IN

Trainer: Jim Clifford

Cost: \$1,375 USD
